PROFILE

Computer Science graduate with academic experience in Figma, user interviews and prototype testing. Created clickable mobile and tablet designs supported by personas, user flows and wireframes. Seeking to contribute to usable public digital services.

SKILLS

Design: Figma, wireframing, clickable prototyping, user flows, task flows, personas, user interviews, prototype testing
Technical background: HTML5, CSS, JavaScript, Python, Django, MySQL
Collaboration tools: Jira, Git, Excel

ACADEMIC PROJECTS

Language-Learning Application Prototype

Individual Human-Computer Interaction coursework | Figma | View design

- Designed two device formats: clickable mobile and tablet prototypes with wireframes and task flows.
- Interviewed users and tested the prototype; created personas, mood boards and brainstorming materials.

Doctor's Appointment and Consultation Web Application

Individual final-year project | December 2024 - May 2025 | Django, MySQL

- Built login and role-based workflows for three user roles: patient, doctor and super-admin.
- Added booking by doctor specialty, appointment acceptance, rejection and rescheduling.
- Added doctor blogs, patient comments, profile editing and admin user management. View source code.

Restaurant Booking Web Application - Team Coordination

Academic team project | Jira, Git, Excel

- Coordinated team delivery by the coursework deadline using Jira, Git and Excel.
- Held progress meetings and identified and addressed project risks.

EDUCATION

Bachelor of Science with Honors - Route of study: Computer Science

University of Wolverhampton | Herald College Kathmandu
November 2021 - August 2025

CERTIFICATION

C# Intermediate | SoloLearn | November 2024
